

# Air compressor connected to electric spray gun video

How do you use an air spray gun?

Put on your safety gear: respirator or mask, goggles, and gloves. Connect your air spray gun to the air compressor using a hose and necessary attachments (such as a filter, regulator, and quick disconnect fittings). Ensure that your air compressor is delivering adequate CFM (cubic feet per minute) as required by your spray gun.

Are spray guns compatible with air compressors?

No. The nozzle design and internal chambers are not compatible with a compressor. Plus, there's nowhere to fill the paint or connect the air hose -- making them irrelevant. Instead, check out the Best Spray Guns for Air Compressors.

How do air compressors work in spray painting?

When it comes to spray painting, air compressors are commonly used to provide the necessary air pressure to atomize and propel paint particles from the spray gun onto the surface being painted. The air compressor takes in ambient air and compresses it, storing it in a tank at a specific pressure.

How do I choose a spray paint compressor?

Most air paint spray guns use a "high volume, low pressure" (HVLP) delivery mechanism, thus it's important to find a spray paint compressor that delivers the required pressure and volume of air in order to create a consistent paint flow that will give you a perfect finish.

How do compressor sprayers work?

And, compressor sprayers -- or pneumatic sprayers -- feature an external compressor to knock out your covering material. And that's the key -- this style of painting requires an additional powerhouse. Turbines and airless sprayers, whether handheld or with an external motor, are complete off-the-shelf machines.

How do airless sprayers work?

Airless machines -- sometimes called hydraulics -- utilize a piston pump to propel liquids. And, compressor sprayers -- or pneumatic sprayers -- feature an external compressor to knock out your covering material. And that's the key -- this style of painting requires an additional powerhouse.
