

Bjlf tong drill rig in kyrgyzstan

What is a hydraulic drill pipe power tong?

The hydraulic drill pipe power tongs are essential wellhead tools for oil and gas drilling operations, widely used in offshore and onshore drilling and well servicing tasks. These power tongs are designed to safely and efficiently make up and break out drill string connections, offering significant labor savings and improved operational efficiency.

What is a type B manual Tong?

Type B Manual Tongs are an essential tools in oil drilling operation to make-up and break-out drill pipe, casing joint and coupling. It can be adjusted by changing latch lug jaws and handling shoulders. All the tongs we offer are API 7K & ISO certificated. Copyright © 2004-2015 by EBIC Oilfield Equipment Ltd. All Rights Reserved.

What is a manual Tong?

Our manual tongs are essential tools for handling various types of drill pipes, casings, and tubing in oil and gas drilling operations. With a long history of developing and manufacturing wellhead tools and equipment, our product range includes more than 50 series and 100 specifications.

What is the capacity of manual tongs?

Capacity 75KN.M. ? All spare parts are traceable and 100% interchangeable. Manual Tongs are necessary tools applied to make up and break out pipes. Changing lug jaws and latch steps can adjust different handling sizes of the tongs. They are designed and manufactured according to API Spec 7K Specification for drilling and well servicing equipment.

What is a high torque Tong?

High Torque Capability: Designed to provide the necessary torque for secure and efficient handling. Comprehensive Range: Over 50 series and 100 specifications to meet various operational needs. Our tongs are compatible with various sizes and provide high-rated torque, ensuring efficient and safe operations.

What is a power tong?

These power tongs are designed to safely and efficiently make up and break out drill string connections, offering significant labor savings and improved operational efficiency. The open-throat design allows for easy disengagement from the drill string, providing high mobility and versatility.

Power Tongs: A Crucial Tool in Drilling and Well Completion In the demanding world of oil and gas exploration, precision and efficiency are paramount. One tool that plays a vital role in ...

The hydraulic drill pipe power tongs, compliant with SY/T5074 standards, provide safe, efficient, and labor-saving operations for offshore and onshore drilling, ...

Bjlf tong drill rig in kyrgyzstan

Our company has experience of drilling at high altitudes throughout the territory of the Kyrgyz Republic, qualified staff, large fleet of vehicles and mobile machines, modern drilling ...

A drilling tong, also known as a manual tong or rig tong, is a manual tool used in the oil and gas industry for making up (tightening) and breaking out (loosening) threaded connections on drill ...

What Exactly Is a Drilling Tong? A drilling tong is a large mechanical tool used in oil drilling operations to grip and rotate the drill pipe, casing, or tubing as it's lowered into or removed ...

LF Style Tongs are designed according to the specifications of API spec 7K, including the torque in 22kN·m, pipe diameter in 2.3/8"to 7", among them large diameter tong extends to the ...

Power tong - An important tool in automated drilling Power tongs are device used to hold and turn pipes found in a drilling rig. They do it help keep time and fast drilling. In ...

What is a Power Tong? Revolutionizing Pipe Handling in Oil Drilling Core Function : A Power Tong (or hydraulic torque wrench) is critical for safely rotating and tightening drill pipes, ...

In the high-stakes world of oil and gas drilling, every second counts and every joint matters. Among the many tools used on the rig floor, one stands out for its blend of brute force and ...

What is a Power Tong? Revolutionizing Pipe Handling in Oil Drilling Core Function : A Power Tong (or hydraulic torque wrench) is critical for safely ...

High-Quality API Standard Equipment: The XQ series Hydraulic Power Tong for rig parts and drilling rig accessories is manufactured to API standards, ensuring exceptional quality and ...

Workover Tong is an essential tool in oil drilling operation to fasten or remove,For Drill Pipes, Collars, Tubing from 3.1/2" to 17" nsult RIGRS for pice

For reliable and smooth drilling oilfield operations, rig tongs are used, which guarantee precise control and eliminate the risks of accidents.

We manufacture and sell hydraulic tongs for use in all drilling industries including down-the-hole (oil well drilling, water well drilling, construction, mining) and ...

Founded in 2001 LLC «Ufagidromash» specializes in manufacturing of large selection of oilfield equipment i.e. hydraulic tongs and spiders used in drilling, running casing, ...

These powerful tools ensure the efficient handling of pipes, casings, and other essential equipment. By

Bjlf tong drill rig in kyrgyzstan

providing stability and control, drilling rig tongs contribute to the ...

Tongs Spectrum Drilling Tools International specializes in manufacturing Manual Tongs, confirming API-7K specifications. These Manual Tongs are specifically designed for making ...

We manufacture and sell hydraulic tongs for use in all drilling industries including down-the-hole (oil well drilling, water well drilling, construction, mining) and horizontal directional drilling. All of ...

Spectrum Drilling Tools International is a manufacturer of Manual Tongs compliant with API-7K specifications. These Manual Tongs are designed for ...

Like casing tongs, they also come in a variety of models depending on your torque specifications. Drill Pipe Tongs: Drill pipe power tongs form drill strings by screwing together drill pipe, and ...

Pipe Tongs: The Grip that Drives Drilling & Well Completion In the world of oil and gas drilling, a sturdy grip is essential. That's where pipe tongs come in, serving as the crucial tool for ...

Type B Manual Tongs are an essential tools in oil drilling operation to make-up and break-out drill pipe, casing joint and coupling. It can be adjusted by changing latch lug jaws and handling ...

Hydraulic Power Tong Download PDF A hydraulic power tong is an essential piece of equipment in the oil and gas industry, designed to provide efficient and reliable makeup and breakout of ...

Power tongs are essential tools in oil and gas, used to grip and rotate pipes for secure connections during drilling, well completion, and maintenance.

Tong (Kyrgyz: ??? ?????, romanized: Tong rayonu) is a district of Issyk-Kul Region in north-eastern Kyrgyzstan. The seat lies at Bökönbaev. [1] Its area is 7,230 square kilometres (2,790 ...

KHT5500 hydraulic power tongs is the open power tongs which is applicable to make up or break out 2 3 / 8 "-3 1 / 2 " drill pipes, 3 1 / 2 "-4 1 / 2 " tubing and 4 1 / 2 "-5 1 / 2 " casing during oil ...

Drill pipe, an industrial tubular used for drilling into the ground, is assembled by screwing together sections to form a drill string. Eckel Drill Pipe Tongs enhance efficiency by reducing drill time ...

Manual tong is an essential tool in oil drilling operations to fasten or remove the screws of drill pipe and casing joint or coupling. The handling size of manual ...

Tongs: The Muscle of Oil and Gas Operations In the demanding world of drilling and well completion, brute force is often required to manipulate heavy pipe, casing, and tubing. This is ...

Bjlf tong drill rig in kyrgyzstan

Tongs: The Muscle Behind Drilling and Well Completion In the world of oil and gas exploration, drilling and well completion are intricate processes demanding precision and robust tools. ...

In oil and gas drilling operations, torque is a crucial factor in ensuring that drill pipes, casings, and other tubular components are securely ...
