

Bulgaria rock water well drilling rig rental

How many wells are drilled in Bulgaria?

During the last 20 years, the company has drilled and completed over 1000 wells for thermal and drinking water in Bulgaria and abroad. The depth of the wells varies from 20m to 2000m with a diameter between 190mm and 600mm. The casing can be steel or PVC certified for drinking needs.

How to drill mud in Bulgaria?

Fortunately, Bulgaria is a country where artesian waters are almost everywhere. Depending on the structure of the soil, the type of drilling is determined. There are two types of drilling technologies. One is done using an air compressor and the other is a mud pump that works with high pressure water.
