

Compressor lubricant Lida

Who is Lida machinery equipment?

LIDA founded and served at air compressor in Taiwan from 1998. LEAN is with a mission to make things better through lean thinking and practice. For more than 20 years, LIDA Machinery Equipment has been on the leading edge of compressed air solutions. Yes Power served with reliable and on site services to be the distribution.

Which lubricant is right for my air compressor?

LE has the right lubricants for most compressor types, whether they are centrifugal compressors, reciprocating compressors, rotary screw compressors, rotary vane compressors or dry screw compressors. When looking for an air compressor lubricant, first look at the viscosity requirements.

What makes Lida a good brand?

LIDA branded originated from Taiwan and has expanded to serve customers in every corner of the globe. Service team offices positioned in Asia and Europe as closer with user sites and offer reliable engineering team. Manufacturing facilities certified all ISO 9001 / ISO14001 ensuring the highest quality standards in manufacturing.

Why is lubricant important for a compressor?

Lubricant plays a critical role in sealing, preventing corrosion, preventing wear, and protecting internal metal parts. LE has the right lubricants for most compressor types, whether they are centrifugal compressors, reciprocating compressors, rotary screw compressors, rotary vane compressors or dry screw compressors.

Who is Lia machinery equipment?

LEAN is with a mission to make things better through lean thinking and practice. Thirty years ago, LIDA Machinery Equipment has been on the leading edge of compressed air solutions and "Yes Power Tech. Ltd." served reliable and on site services to be the distribution in Taiwan as well as technology for OEM team inspected.

How does a compressor lubricant reservoir work?

Reservoirs also often have oil temperature controls that provide for preheating during cold start-up conditions and cooling to prevent overheating during peak operating cycles. The reservoir may be pressurized or vented. When in operation, the compressor lubricant oil is normally circulated by the main oil pump.

Oil or lubricant is essential for a long-lasting air compressor. Learn how to maintain your equipment with Hodge Industrial's easy-to-understand guide.
