Who is liable for oilfield accidents?

Different entities may be liable for damages resulting from oilfield accidents, including employers, equipment manufacturers, and other third parties. In many cases, the company that is in charge of an oilfield may be responsible for injuries that occur on the job site.

What should I do if I've been injured in an oil field accident?

If you've been injured in an oil field accident, you should alert your supervisor immediately about the situation. This will ensure that there is accurate and timely documentation of the accident. Next, you should seek emergency medical treatment to have your injuries evaluated.

Are You entitled to financial compensation for an oil field injury?

You may be entitled to financial compensation for your injuries and our law firm can help. Schmidt & Clark, LLP is dedicated to protecting the rights of the American oil field worker and is one of the only firms willing to handle this type of complex litigation throughout the entire United States. Start My Free Case Review What is Negligence?

Are oilfield accidents dangerous?

Even when oil companies implement proper safety protocols and procedural training, contractors, equipment manufacturers, and other entities can still negligently or intentionally take shortcuts, endangering the lives of oilfield workers. Oilfield accidents can cause many severe injuries, including (but not limited to):

Are oil field workers dangerous?

American oil field workers face dangers on the job that are unheard of in almost any other line of work. In what is statistically one of the top five most dangerous occupations in the U.S., there is no room for even the smallest act of negligence. When employers fail in this fundamental duty, they put the lives of their employees at risk.
