

Electric air compressor emits black smoke upon startup

Why does my air compressor start smoking?

Air compressors come with single or dual pistons that improve the performance of the unit. Malfunctioning pistons can cause the engine in your air compressor to start smoking. Piston rings should be changed often, as recommended by the manufacturer or your repairman, to avoid a smoking air compressor engine. The air valve holds the air in the tank.

Why is my air compressor motor getting hot and sparking?

The motor may be dual voltage high/low voltage make sure the wiring matches incoming power to motor. Compressor motors and pumps getting hot and creating smoke! If you have any questions regarding your air compressor motor getting hot and sparking or smoking, please leave a comment below and a photo if applicable so that someone can help!

What should I do if my air compressor starts smoking?

The first action you should take if your air compressor starts smoking suddenly is to turn off the engine. This action can save your air compressor and prevent further damage if the oil level has dropped too low. After allowing your air compressor cool down, have a look at the following parts to know if they have been compromised.

What causes a hot compressor motor?

An incorrect power supply could quickly cause a hot compressor motor. Since I can't see the amount of smoke, I can't be sure that it's not just a by-product of a new motor start-up, or if the smoke is a symptom of a serious problem.

Why does my air compressor smell like rubber?

The air valve holds the air in the tank. If the air valve in your compressor unit is faulty, the air will escape from the tank. This puts a strain on the air compressor engine and can cause smoking. The smell of burning rubber is mostly due to an oil leak.

Why is my air compressor blowing up and breaker tripping?

Fuses blowing up and breaker tripping is one of the common air compressor problems in my own home. It happens due to the underlying problem with the electrical parts of the compressor. Below I have mentioned a range of things that you should look at when fixing this air compressor problem. Solution 1: Replacing the Unloader Valve.
