

Flow chart

How do you make a flowchart?

There are several ways to make a flowchart. Originally, flowcharts were created by hand using pencil and paper. Before the advent of the personal computer, drawing templates made of plastic flowchart shape outlines helped flowchart makers work more quickly and gave their diagrams a more consistent look.

What is the purpose of a flowchart?

A flowchart is a pictorial representation of the workflow of a system. The purpose of drawing this chart is to make it clear and easy to understand. It can also help you to avoid confusing and misunderstanding things. It allows you to get a snapshot of the main process simply.

What shapes are used in a flowchart?

Let's take a look at the commonly used shapes in flowcharts: The "Start" shape is represented by an oval or a rounded rectangle. It indicates the beginning of the program or a specific process. In the given pseudocode, the "Start" shape is denoted by the word "Start Intelligence." The "Enter" shape is represented by a parallelogram.
