

Halco drilling rigs in brazil

What rigs are being hired at the Roncador rig?

The hired rigs are the Laguna Star drillship from Constellation's fleet and the Tidal Action newbuild drillship owned by Hanwha Drilling. Both are expected to work at the Roncador field in Brazil's Campos Basin, creating 250 jobs and retaining as many for around 2.5 years.

Which countries will lead oil rig contracting?

Brazil, one leg of the "golden triangle" of offshore oil and gas -- the other two being the Gulf of Mexico and West Africa -- is expected to lead rig contracting activity, with oil giant Petrobras keen on adding to its already vast fleet.

Which oil companies are looking for a floater rig in Brazil?

In addition to Petrobras, international oil companies including Equinor, Shell, TotalEnergies and Petronas are also seeking rigs to carry out exploration and production development campaigns in Brazil, with work expected to commence in 2023 and 2024. "There are no high-spec available floaters in the region.

Is the well services market growing in Brazil?

With Brazil adding more blocks, both onshore and offshore, up for grabs for potential investors, the well services market in Brazil is poised to grow in the coming years.

Where will Petrobras rig be deployed?

The rig will be deployed to the Roncador field in the Campos Basin offshore Brazil, thanks to this contract, which is expected to take 30 months and comes with some optional periods. Petrobras has decided to reopen this field to boost natural gas production.

Will Brazil see a wave of drilling activity?

Brazil is currently seventh among the top global crude producers and will join the top five by 2030, per our current hydrocarbon production projection. To support this expected growth in production, Brazil will see a wave of drilling activity.
