

How to drill a water well with a drilling rig video

Can I drill my own water well by hand?

Our most popular video for those who are interested in drilling their own water well by hand. Known as a "Large Bore" DIY water well, this video has step by step instructions and diagrams to educate you on every aspect of your well. Click here for a written recap of the 5 steps described in this video.

How deep can a rig Drill a well?

Modern rigs can drill wells hundreds of feet deep,as needed,to reach aquifers. Throughout drilling,the crew monitors drilling parameters and watches for signs of water in the formation. The borehole diameter is typically a few inches wider than the final well casing.

How do you drill a water well?

It is somewhat similar to the rotary bit method which most real water well drillers use for water bore drilling. The DIY technique involves water pumped down the center of a PVC schedule 40 pipe used as both a drill stem and a drill bit. At the bottom end of the PVC pipe a "drill bit" is fashioned by cutting teeth into the end of the PVC pipe.

How does a water drill rig work?

Water drill rigs use a combination of high volume varied pressure air,water and drilling mud to expel cuttings,unless want to withdraw the drill at regular intervals not much else will function and will wedge drill head in bore hole in short order. Cable tool rigs do not use a medium to flush the well. They bail out the cuttings as required.

Is drilling a water well a DIY task?

Drilling a water well is not a DIY task- it requires specialized rigs,trained crews,and adherence to regulations to ensure a safe,clean water supply. Professionals follow a series of well-defined steps,use appropriate drilling methods for the local geology,and implement safety and environmental safeguards throughout the process.

How much does it cost to drill a well?

For irrigation and lawn watering,reaching an aquifer isn't necessary. You only have to drill under the standing water level. It is very likely that you can drill your own well. Many successful wells have been drilled using this well drilling method. It is cheap. You can expect the "drilling" portion of the project to cost about \$200.

It is much slower than rotary drilling but is still widely used in some areas because the equipment is simple to operate and less expensive than rotary drilling ...
