

Korean rock drill drill bit instruction manual

How do you operate a guide Shell drill?

Operate each lever in the hydraulic cylinder control to move and fix the guide shell to the drilling point. - In the case of downward drilling, press down the guide shell foot bed on the ground by the guide slide cylinder, to prevent shaking. - Turn 'ON' the anti-jamming, dust collector and dust collector pulsing switches. Operation Manual 67

What are the basic considerations for drilling?

2-6 Basic Consideration for Drilling A basic consideration for drilling involves a combination of proper feed force and alignment of the axes of drifter, shank rod and bit in a straight line, while paying constant attention to any play in drifter, deflection/deviation of rod, and dislocation of guide cell.

Where are rock drill spare parts made?

Spare Parts are proudly made in Korea(South) and supply to all over the world. It is important to make the material stronger, tougher, more durable and more resistant to wear. What you see from here is what you get. Please do not hesitate to contact us any time if you need any rock drill and rock drill spare parts.

How do I know if a rock drill lubricator is good?

Check if the lubricator is filled with a sufficient amount of oil. Check if the recommended rock drill oil is used. Check if proper amount of oil mist is supplied. The proper amount of oil is defined as such that a satisfactory oil film becomes formed over the shank rod. Form 027-1007

Can rock drill oil be used in service mast?

In addition to meeting the above specifications, the Rock Drill Oil must perform satisfactorily in the drill. There is possibility for meeting these specifications, the quality of the product, and its performance in service must necessarily rest with the oil supplier. Form 013-1004 YH-135 13 Apr. 2010 Instruction & Operation Manual YRM

How do I set a rod on the rotation feed percussion?

ROTATION FEED PERCUSSION 6 6 1 : Move arm to the center position for rod adding and collecting. 2 : Move arm to the return position 3 : Rotate star to the right for rod storing 4 : Rotate star to the left to set a rod on the arm. *When you load/unload the rod, the clamp will be opened automatically before the star starts moving.
