

Pionjar 120 rock drill 100m 6 inch

What is the pionjar 120 drilling system?

The Pionjar 120 Drilling System is a cost-effective solution for the environmental sampling of soils between 5 to 8 meters in depth. No longer are you restricted to large, truck mounted drilling rigs on environmental projects and sensitive work sites.

What is the difference between a pionjar 120 and a Combra Combi?

The Pionjar 120 is the "classic" backcountry rock drill. It was produced from the late 1970s until the mid 2000s. It was replaced by the Combra Combi series of drills and support for the "Pionjar" labeled models has since been discontinued. Both drills feature the same 185cc 2-stroke engine, the same 7/8 x 4 1/4" chuck and similar fuel capacity.

How does the pionjar 120 work?

The Pionjar 120 is portable, thus enabling the drill to be hand carried by our crews into sensitive or forested areas. The entire unit can also be moved on site by ATV, boat, raft, snowmobile, helicopter or airplane. Both the Pionjar 120 and the Electrical Drilling System are often transported with our crew by commercial aircraft.

What size PVC does a pionjar 120 use?

The standard PVC for the Pionjar 120 is 1.75" O.D., other sizes include 0.75" and 2.0" PVC. ANY JOB, ANYWHERE! The Pionjar 120 is portable, thus enabling the drill to be hand carried by our crews into sensitive or forested areas. The entire unit can also be moved on site by ATV, boat, raft, snowmobile, helicopter or airplane.

The internal combustion rock drill type YN27C is a very efficient hand held drill machine built up with gasoline engine, air pump, rock drill and the rotation plumbum equipment for running or stop.
