How are our rock drill bits manufactured & approved?

All of our rock drill bits are manufactured and approved according to the strict standards that are set in place by the API and the IADC.

Which drill bit is best for hard rock drilling?

Keep constant down pressure and do not allow the drill to bounce in the hole and H thread should work very well in most hard rock drilling applications. This bit has 4 large silver brazed carbide inserts that hold up extremely well in production hard rock drilling applications.

What size drill shank do I Need?

When you move to the bigger hand held drills, there are only 3 common shank sizes. 7/8 x 3/8", 7/8 x 1/2" and 1 x 1/2". These measurements refer to the diameter of the hex steel (measured across the flats) and the length above the retaining collar.
