

Romania rock drill 100 oil manufacturer

When was the first oil well drilled in Romania?

The first petroleum distilleries in the country are mentioned in the first half of the nineteenth century in Gazarie, Moinești district. The first oil well in Romania (in 1861), which is also the first commercial oil well in the world, was drilled into the oil basin of Moldova.

What is rockdrill 100 oil?

Rockdrill 100 oil has been formulated to protect against corrosion and to withstand high pressures in sliding vane air motors. In all applications the importance of choosing the correct viscosity is emphasised to ensure maximum operating efficiency of equipment. This product is available in the following quantities:

Why is rockdrill 100 a good lubricator?

On pneumatic tools, the expansion of air may cause the temperature to be considerably lower than ambient. Rockdrill 100 is formulated to be free flowing through airline lubricators and integral oilers under these conditions.

How does rockdrill 100 work?

Rockdrill 100 is formulated to be free flowing through airline lubricators and integral oilers under these conditions. A second characteristic of air is that the relative humidity increases with decreasing temperatures, and unless the air has been specifically dried, water vapour will condense out into the working surfaces of the pneumatic tool.
