

Screw air compressor disassembly and repair video

How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

How long does it take to fix a broken air compressor?

You can replace a broken air compressor pressure switch in about 45 minutes. ...If the air compressor won't fill the tank with compressed air, rebuild the pump using these steps in about 45 minutes. ...You can replace a defective air compressor check valve in about 10 minutes. ...Find the perfect fit for your refrigerator.

How do you remove a compressor rotor?

Use a slide hammer (M8) to remove the dowel pins (K51) located on both sides of the compressor. Loosen the hex bolts connecting inlet casing (B01) and rotor casing (B02) Apply jack bolts to the inlet casing to separate it from the rotor casing. Slide the inlet casing horizontally away from the compressor.

How does a screw compressor differ from a rotary lobe blower?

ROTOR In its construction the screw compressor closely resembles the well-known rotary lobe blower. It differs, however, in its peculiar rotor profile and its very large helix angle (the wrap angle of a mail rotor is 300 degrees in most cases). The rotor profile is the unsymmetrical type as shown in Fig-1.2 having both convex and concave faces.

Does Sears sell air compressor parts?

And Sears PartsDirect has more air compressor repair help for you, including troubleshooting advice and maintenance tips for brands such as Craftsman, Devilbiss, Ingersoll Rand and Campbell Hausfeld. Search your model number to find a complete list of replacement parts, then order the part you need.

What should I do if my air compressor is too low?

If the capacity of the air compressor is really too low, check the following: Check differential pressure over oil separator. Replace separator when necessary. Check and replace compressed air filters (if installed). Compressor does not unload. Check if pressure switch is correctly set and working.
