Who is DUP compressors?

DUP Compressors is Europe's market leader in the purchase and sale of pre-owned industrial compressors and compressed air dryers. DUP also supplies replacement parts for purchased screw compressors, rotary tooth compressors, compressed air refrigerant dryers and compressed air adsorption dryers.

Why should you buy a used screw compressor?

Piston compressors are also used as respiratory and air compressors and are extremely versatile. Purchasing a used screw compressor is especially ideal when you require continuous compressed air consumption without major peak loads.

What can you use a second-hand piston compressor for?

Use your second-hand piston compressor, for example, to operate compressed air tools such as nailers, spray guns, staplers or impact screwdrivers, or integrate them into your home for painting or pumping up balls, air mattresses or tyres. Piston compressors are also used as respiratory and air compressors and are extremely versatile.

What is a screw compressor & how does it work?

Screw compressors are recommended for very sensitive compressed air loads in particular, as they offer a very cost-effective way of compressing to final pressures of between 5 and 14 bar and a pulsation-free volume flow. You can even choose from the usual maximum pressure levels: 7.5 bar, 8 bar, 10 bar and 13 bar.

Screw compressors also boast advantages with respect to the efficiency of compression, because piston compressors lose approximately a tenth of the suctioned air via the piston rings.
