

Used oil drilling rig inspection low cost

What is rig inspections?

Our Rig Inspections (RI) team delivers a wide variety of rig inspection services, with a global team of inspectors who have extensive industry experience and in-depth knowledge across all types of rigs, both onshore and offshore oil rigs.

Who conducts rig inspections?

Rig inspections can be conducted by either the owner or operator of a drilling asset. Services for rig commissioning are conducted prior to the equipment entering service. This can be at the end of construction or during major overhauls and five-yearly inspections.

How many oil rig inspections are there?

Our track record includes over 750 rig inspections across North America, South America, Europe, Africa, the Middle East, India, and Asia Pacific. As the oil and gas industry continues to face evolving demands, oil rig inspections have become increasingly vital for ensuring safety, operational efficiency, and compliance.

What rig inspection services does ABL offer?

ABL's rig inspection services use the latest in reporting and video technology to document and record aspects of rig acceptance testing, such as tubular handling, which can be used to support crew competency and identification of potential drilling time efficiencies. Industry provider of choice performing over 750 rig inspections annually.

What is rig inspection & rig commissioning?

Rig inspection and rig commissioning are critical to the oil and gas industry. Rig inspections can be carried out both before the hiring of a drilling asset and during the contract. A pre-hire rig inspection/audit assess the condition and suitability of the asset for a drilling contract.

Why are oil rig inspections important?

As the oil and gas industry continues to face evolving demands, oil rig inspections have become increasingly vital for ensuring safety, operational efficiency, and compliance. Key challenges include:
