

Where to recycle diesel air compressors

How do you dispose of an air compressor?

To dispose of an air compressor, first separate its components. Most accessories like the pressure switch, regulator, drain tank valve, and feet/stand can go in your regular trash. The metals, including the motor, can be sold for scrap.

Can you recycle an air compressor tank?

While the metals of an air compressor, including the motor, can be sold for scrap, the tank itself can be recycled. However, you will need to call ahead to a scrap metal recycler to ensure they can accept it. Alternatively, there are DIY projects that can be done with an air compressor tank if you have time and want to reuse it.

What should you do before recycling an air compressor?

Before recycling an air compressor, release all pressure from the tank to prevent dangerous, accidental releases during the recycling process. Often, however, selling or donating old air compressors depends on their level of functionality.

Can an air compressor be placed in a trash can?

No, an air compressor is too big to fit in the trash can. It typically consists of a motor, a tank, a pump, and some cords. To dispose of it, you'll need to separate every part possible for recycling.

Can I throw away my old air compressor?

Many local laws prevent you from just throwing away your old air compressor. You cannot simply put it in the trash can due to its size and components. Typically, an air compressor has a motor, a tank, a pump, and some cords. You'll need to separate every part possible to recycle it.

Where can you sell an air compressor?

If your air compressor is still in working condition, and you think it's good enough quality that you could make some money off of selling it, then selling it may be the choice you'd make. Most social media marketplaces and auctions such as Craigslist, Facebook Marketplace, and eBay are good places to sell your compressor.
